PROFILE SUMMARY

I'm a **BCA** undergraduate at **GD Rungta College** and I am passionate about **software development**, **UI design**, and **Graphic design.** I'm constantly engaging myself in the latest industry trends and technologies to keep enhancing my skills. It's not just a hobby for me; it's a burning desire to create, innovate, and push boundaries in the world of technology and design!

EXPERIENCE

Frontend Web Developer
NJ Designpark   **August 2023 - October 2023, Durg, Chhattisgarh, India · On-site**

• In this internship, I handled Frontend Web Development and User Experience Design to revolutionize web solutions.

• In addition to Development, I executed Unit Testing and conducted SEO Research.

• My skills include Adobe Photoshop, Front-End Development, and proficiency in Figma software.

PROJECTS

MEDecode - Decode your medicine
HackThisFall 4.0 • January 2024 - February 2024

• This project was developed for the **HackThisFall 4.0 Hackathon** which was hosted by Karnavati University.

• MEDecode is a progressive web app that is used to get detailed information on medicine just by scanning the leaflet of medicine.

Job Portal Website [Django Project]
GDRCST Bhilai • https://github.com/shuvbhamm/Job-Portal-Website-using-Django • November 2023 - January 2024

• Job Portal Website is my final year major project, This is a web-based solution where I developed 3 interfaces each for Applicants, Employer and Admin for monitoring.

• I have used the waterfall model for the building approach of this project.

• Tech Stack used for building this project is **Django and SQLite.**

Krishi Vriksha - Live Marketplace for farmers
OpinHacks Hackathon • https://github.com/shuvbhamm/OpinHacks---Krishi-Vriksha • September 2023 - September 2023

• Krishi Vriksha (कृषष वक्ृ) is a web application that comes with multi-lingual support, where farmers can connect with live markets globally for their better knowledge of the market, Farmers can also buy farming-related products from this platform. This is a one-stop solution for farmers.

• This project is developed in the **OpinHacks Hackathon** by my team. This website can be trusted because the data we are gathering is from the National Database API.

DropWorld - Opinion without Identity
RCET Bhilai • https://github.com/shuvbhamm/DropWOrld_IdeaFiesta • December 2022 - December 2022

• This project is developed in a Hackathon at RCET College.

• Have you ever thought of sharing your opinion with any specific community, This project does the same thing, it gives you the power to share your thoughts anonymously.

Jordan Brands UI Website
Personal Project • https://shuvbhamm.github.io/jordan-website/ • November 2022 - November 2022

• Jordan Brands is one of the mini projects of learning UI implementation, and I started with Jordan Brands UI.

• This is a fully responsive page and is created using Vanilla CSS and pure HTML5.
